## PROFILE

I'm a DIT (Digital Imaging Technician) with 5 years of experience in the Italian film and commercial industry. This experience gave me familiarity with most of the modern digital camera Arri/Sony/RED, with different optics and with many different kind of workflow and its component: live color grading / color management / video signal pipeline on set / dailies creation / data management.

As DIT I have experience in live grading, image continuity, exposure and QC on set. Capable in managing the color pipeline to give the proper evaluation and creative tool to the Director of Photography, understanding the different needs and requests for each project. Capabilities in designing workflow for either data and color management for to cover the different needs in both commercial and movie.
